FIDO'S FLORA

"If you can do one thing for your adored beast... this is it" - Julie Anne Lee DCH

Probiotics from dogs for dogs. Made with 2 canine species specific strains

(derived from healthy dog poop)

Did You Know?

Most pet probiotics on the market today have been developed for humans, not animals. Fido's Flora contains two species of canine-derived probiotics that have been tested and proven to survive the acidic environment of a dog's digestive tract.

Did You Know?

Julie recommends Fido's Flora for any dog who has been on antibiotics. Since antibiotics destroy all bacteria in the gut, Fido's Flora is helpful in repopulating the friendly bacteria.
